EuroSciPy 2015

AUGUST 26-30 | CAMBRIDGE, UK

🐦 @euroscipy

EuroSciPy is the European meeting for scientists using Python.

Sponsoring the EuroSciPy 2015 conference gives you access to many of Europe's most talented scientific Python users, all in one place.

It is also a unique opportunity to provide training to in-house research staff during the tutorial days.

Python is one of the fastest growing languages today, in part due to its numerous scientific and numeric libraries that make it an ideal tool for data analysis and computation.

EuroSciPy 2015, held at the University of Cambridge, will feature two days of tutorials, two days of scientific talks, and satellite meetings.

Scientists across academia, research, and the private sector all gather at EuroSciPy to share their latest projects, exchange best practices, and learn from skilled users and developers.

Your sponsorship will provide the resources to make this event possible and contribute to the advancement of scientific Python tools.

CALL FOR SPONSORS
